DDA Access Audit of Green Vale Homes Properties May/June 2008.

Green Vale Homes recently commissioned DCS to carry out a full DDA access Audit across a range of properties including both commercial and residential.

We found DCS to be extremely helpful and professional in their approach to the audit. They executed the work within the specified time limits and the finished reports are clear and well presented. They were also happy to discuss the findings and make various recommendations to help us prioritise our action plan.

I would have no hesitation in recommending DCS.
